DROP-IN DAY

TODAY IS DROP-IN DAY

Members of the public who have made advance reservations (more than 600 of them) will be attending lectures on campus today during our first pilot "Drop-in Day". Unfortunately, because the 'phone calls have been coming in at a rather hectic pace, and we have been accepting them up to the last moment, it has been impossible for us to let those members of faculty who volunteered seats for guests know how many visitors will be attending their particular classes (in NO case more than were requested). If you are interested in knowing please 'phone the Department of Information on local 3441. At 3 p.m. a special coffee session has been arranged in Room S856 of The Ross Building and we hope as many members of faculty and senior staff as possible will be able to drop-in and mingle with our guests.

EVENTS

Man Did They Drop In!

Although feed-back hasn't been completed yet, it seems that our pilot "Drop-in Day" was something of a smash success. More than 650 visitors "dropped-in" on regular classes yesterday and a good many more members of the public (including Marshall McLuhan, the Hon. A.A. Wishart, Q.C., Attorney General, and Toronto Alderman June Marks) phoned to say they were unable to attend but thought it was a great idea and would try to make it next time. There were a few small problems with cancelled classes and lost visitors...but all in all it worked out very well. A great deal of credit must go to all those members of faculty who not only made space available for our guests but went to extra pains to ensure they felt as welcome as possible. If anyone has comments or suggestions regarding the operation, we would most appreciate a note addressed to the Information Department, Room S833, The Ross Building.

GENERAL

- * The Department of Physical Plant informs us that an increasing number of telephones are being placed on "Hold" for some considerable time or simply "left off the hook". Bell Canada consider this a misuse of the telephone equipment and results in a disruption of the standard of telephone service to the rest of the University community. Furthermore it jeopardizes the use of emergency procedures. They inform us that should this practice continue then they may be required to follow their normal procedure and disconnect any such line.
