GENERAL

- * In view of the active co-operation of the majority of drivers on the York campus and because of representations from concerned parties the chains restricting access to the inner areas of the campus will be removed. This action will be on a trial basis for the present. Any abuse of the parking facilities in the inner areas that can be attributed to such relaxation will result in the re-installation of the chains.
- * The Director of Safety and Security Services reminds all members of the University community that when fire alarm bells sound in any building, that building is to be evacuated immediately. Under no circumstances should elevators be used for this purpose. Occasional false alarms are inevitable, and because of them there has been a tendency to develop a casual attitude towards the sounding of alarm bells. This attitude endangers the community and all alarms must be assumed to be genuine until Mr. E.C. Richards, the Safety Officer, or the Fire Department has investigated the incident.
- * The Vice-President (Administration) draws the attention of all members of the University community to a Regulation of the Ontario Public Health Act which prohibits dogs or other pets from any premises where food is prepared, served or stored. The only exception permitted is a dog serving as a guide for someone who is blind. GENERAL

- * The Communication Co-ordinator reminds all telephone users that the period of evaluation and restraint, brought about by lack of funds in the telephone services budget, is now in progress. Everyone is asked to carefully assess their existing requirement and to report any facility which may have outgrown its usefulness. The average cost of service per telephone on this campus being in excess of \$12.00 per month, every instrument, button, buzzer, intercom or line illumination feature that can be disconnected--even for a couple of months perhaps--will be an important contribution towards helping maintain the present level of expenditure whilst meeting the needs of all new requests for service. Please evaluate your facilities objectively, with the cost in mind, and if you can economize in any way call 2337 or include all relevant details on the Telephone Census forms which are presently in circulation.
- * In view of the active co-operation of the majority of drivers on the York campus and because of representations from concerned parties the chains restricting access to the inner areas of the campus will be removed. This action will be on a trial basis for the present. Any abuse of the parking facilities in the inner areas that can be attributed to such relaxation will result in the re-installation of the chains.
