- * Department of Safety and Security Service, Fire Safety Bulletin:
The evergreen Christmas Tree, safe with intelligent use, can present a serious fire hazard if improperly handled. The following are a few simple steps to safe enjoyment of your tree:
 1. When picking out a tree, select one with fresh firm needles.
 2. Saw off butt at an angle one inch above original cut.
 3. Stand in water and top up regularly.
 4. Support firmly, do not place it near any source of heat such as fireplaces, radiators.
 5. Locate where it will not topple over and block an exit route.
 6. Do not smoke near tree.
 7. Use of fire-retardant chemical spray on your tree is no substitute for butt immersion and is not recommended.
 8. No open flame devices such as candles should be used on or near the tree.
 9. Use only flame-proof paper based decorations. Where possible use angel hair, metal or non-combustible decorations.
 10. Place all excess wrappings, etc. into a waste material container for proper disposal.
 11. Before using lighting sets check for wear and test before installing. All sets should bear the C.S.A. or U.L.C. label of approval.
 12. Metal trees should have indirect illumination only. Do not install lights on or in contact with tree as it could become electrically energized.
 13. To complete your Christmas Fire Safety Program, make arrangements for an inspection of your tree and decorations by contacting Mr. Bob Richards, Safety Office, local 3351.
