- * The Safety Officer of the Department of Safety and Security Services advises that with the approach of the festive season special care should be taken when selecting Christmas trees and decorations for installation in University buildings. For fire safety purposes the tree should be fairly fresh with firm needles: saw the butt at an angle one inch above the original cut, and stand in water and support firmly. Place away from all heat sources and where exits will not be blocked. Do not use open flame devices such as candles; use only CSA or ULC approved lighting sets (these should be tested and checked for wear prior to use). Indirect illumination is recommended for metal type trees, as they can become energized if equipped with electric light sets. Decorations should be of the flameproof or non-combustible type, and all waste wrappings should be promptly collected and disposed of. Most importantly, keep matches and smoking materials at a safe distance from the tree. Arrangements for the inspection of these installations may be made by contacting the Safety Officer at local -3351.

To date, many offices have requisitioned quantities inconsistent with their earlier estimates, while others have so far not followed through with their requisitions at all. Please recognize that 'dated' items are ordered only to exact needs. Stationery Stores, the vendors and the manufacturers are all anxious to avoid left-over quantities of these items. To secure your needs for the start of the new year, please send your order to Stationery Stores without delay.
