GENERAL

The Department of Security & Safety has recently purchased a proprietary state of the art fire and security alarm system which is soon to be installed in the new security control centre. This new system will give the Security Department the capability to alarm and monitor any building on Campus, any area within a building, and/or any room within a building. Equally important is that because of additional communications equipment and security vehicles purchased recently, the response time by York Security to an alarm will now be in the order of only minutes. This system is expected to be fully operational by the end of May 1986. Any department, faculty, faculty etc., interested in obtaining protection from this alarm system is requested to contact Mr. J. Santarelli, local 3767. A nominal installation and monthly service fee is required from all users.

The Department of Security and Safety Services informs the York community that in the interest of greater safety, arrangements have now been completed to have a flashing yellow warning light installed at all campus pedestrian crosswalks. These flashing lights are intended to attract the attention of a vehicle driver to an approaching pedestrian crosswalk, and do not in any way lessen a pedestrian's responsibility to exercise extreme caution at all times when in or entering a pedestrian crosswalk. The York community should also be advised that speed control bumps are being installed at two locations on Ottawa Road, in order to reduce speeding. They will be installed at the east and west end of the East Office Building. The cooperation and understanding of the York community would be much appreciated.
