The International Space University (ISU)

Members of the York University community are invited to an information session at:

4:00 pm - 6:00 pm
Tuesday, September 15, 1992
Vari Hall, Lecture Hall C

The Institute for Space and Terrestrial Science (ISTS) has been co-ordinating a bid to have the permanent campus of the International Space University located in Ontario at a site on the campus of York University. At present, the ISTS bid is on the ISU short-list along with bids from France and Japan.

As the possible association of ISU with York University raises a number of issues, there is a need for the community to be informed and for the regular processes of the Senate, the Board and the administration to be engaged to review them. This information session is being sponsored by the Senate to ensure that members of the community have access to information about the bid and as a means for informing members of Senate committees about the issues.

A draft report of an ad hoc working group of Senate’s Academic Policy and Planning Committee will be circulated at the information session as means of informing the community of the process which Senate will pursue in reviewing York’s possible association with ISU.

GENERAL:

Traffic woes: The province has suddenly made funds available for the widening of Steeles Avenue. Unfortunately, there are severe time-limits attached to the funding. Steeles Avenue will be an area to avoid for the rest of the construction season. Other construction areas such as Shoreham Drive, which was originally scheduled to be completed by the end of September, should now be completed by mid-October because of rain delays. The campus is also being inundated with "non-community commuters" trying to avoid the traffic congestion off-campus. To help this unfortunate situation, Metro has opened the Pond Road intersection at Keele Street. Access is as follows: 1) In-coming right turn onto Pond Road for southbound Keele Street traffic; 2) Out-going right turn from Pond Road for traffic southbound on Keele Street; and 3) In-coming left turn across median for northbound Keele Street traffic. The traffic signals around the campus have been adjusted to favour traffic moving on and off the campus at Keele and Caradoc, at Finch (the left signal onto Sentinel has been increased from 8 to 20 seconds), Founders and Steeles (the advanced green has been extended considerably in an effort to ease the Keele-Steeles gridlock that was occurring), and the green signal from Shoreham at Jane has been extended from 25 to 34 seconds. This intersection does not have the equipment to permit an advanced green for left turns, but Metro may have it installed. Metro is open for other suggestions. Please call the Construction Hotline at -55445.
